

HOJA TECNICA

Product Description

119T is a translucent, high viscosity and slow setting general purpose white glue stick. It is designed for use on the paper, cloth and plastic related applications.

Basic Material	:	Synthetic Resin (Ethylene Vinyl Acetates)		
Physical Properties	:	Appearance : Translucent white stick		
		Viscosity (Brookfield Thermosel, Model Brookfield RVT Spindle No 27)		
		<u>Temperature (°C)</u>	<u>Viscosity (cps)</u>	
			<u>Average (cps)</u>	<u>Variance (cps)</u>
		170°C	16500	2500
		Softening Point (°C)	: 87	+/- 5 (Ring and Ball)
		Odor	:	None
		Set Time	:	15 ~ 20 seconds
		Open Time	:	45 ~ 50 seconds
		Water Resistance	:	Excellent
		Application Temp	:	160°C to 190°C
Application Method	:	Hot melt glue gun		
FDA Status	:	Product compositions meet requirement of in-direct food additives regulation 21 CFR 175.105 -Adhesives.		
Packaging	:	25kg /Carton		
Precautions	:	Keep unused adhesives in closed carton and away from dusty area. Glue applicator is hot, avoid touching any part of the applicator other than its glue tank handle when adding new glues.
